## Summary

---

Software engineer with 5+ years building mobile SDKs and production game systems across iOS and Android.

## Experience

---

**Software Engineer 2, Identities**, Zynga – Remote Jan 2023 – present

- Lead system design and C#/C++ development for Account Recovery after Reinstall across iOS Keychain and Android Block Store, coordinating cross-platform test plans with QA after six-stakeholder approval
- Delivered Google reCAPTCHA v3 for C++ auth SDKs on iOS and Android, including Unreal, adding bot protection and unblocking release validation
- Redesigned Android 11+ SSO so titles could restore native sign-in; production logs shifted from failures-only to successful token operations
- Shipped same-session email-link verification in the Unity auth SDK so the game updates verified-email state without a relaunch or polling
- Refactored Android AAR publishing to JFrog Artifactory across four auth SDK libraries, splitting snapshot and release repos so games can consume in-dev builds without mixing them into release

**Software Engineer, Unity**, Playdots – Remote June 2021 – Jan 2023

- Owned core gameplay systems in Unity C# for Two Dots, a top-100 mobile title, delivering the level editor pipeline and mechanics that powered ongoing releases
- Led Garden Tails from alpha to Apple Arcade global release, architecting the localization pipeline and ensuring App Store compliance for worldwide distribution
- Shipped Unity C# monetization systems for Garden Tails, including an MVC Credits scene and in-game economy features that drove player re-engagement

## Education

---

**California State University, Fullerton**, B.S. in Computer Science – Fullerton, CA Jan 2021

## Skills

---

**Languages:** C#, C++, Kotlin, Objective-C, Swift

**Platforms:** iOS, Android, Unity, Unreal Engine 5

**Tooling:** Gradle, CMake, JNI, SPM, JFrog Artifactory
